

DiaQ[®]

Transducer Protector

DiaQ[®]

Transducer Protector

Transducer Protector are used in Hemodialysis blood lines to keep the blood side of the circuit separated from the machine side, and to prevent contamination of the machine by the blood flowing through the circuit. This contamination could be very dangerous and can lead to patient cross contamination with hepatitis B or other virus. Transducer protectors let air pass while preventing the blood from passing through. TP's incorporate bacterial retentive membrane.

Membrane Solutions transducer protectors are also suitable as air or gas vents. Venting characteristics are achieved by using hydrophobic membranes. Membrane Solutions has a full range of transducer protector products which incorporate either highly hydrophobic PTFE or hydrophobic acrylic membranes, and custom products can be manufactured upon request.

Features

- Hydrophobic membrane with 0.2 micron pore size.
- Prevents contamination of the internal pressure monitoring lines.
- Sterile, Non-Pyrogenic.
- Ridged finger grip around the outside for better grip.
- Fast Response.
- Antibacterial hydrophobic air filter with female luer lock/male luer lock
- Choice of media to accommodate sterilization methods
- Colored housings available for identification
- Custom printed blister packaging available
- Housings designed to withstand pneumatic pulsing

Application

- Connect blood tubing with dialysis machine.
- Protective hydrophobic barrier allows only sterile air to pass through, protecting patients and equipment from cross contamination
- Prevents blood and dialyzing fluid from damaging sensitive transducer monitoring devices.

DiaQ[®]

Dialysis Dressing Kit

Dia Q Dressing Kits are designed in accordance with procedure type to meet the needs of Dialysis Treatment & Catheterization preparation and procedure. All kits are assembled using high quality components at clean room and all components are packaged in a convenient way to save staff time. The sterile, ready-to-use format is standardized for clinical treatment, helps to reduce hospital acquired infection.

- **INFECTION CONTROL**

Infection prevention is one of prime importance among healthcare providers and patients, disposable sterile dressing kits help to prevent HAI (Hospital Acquired Infection).

- **TIME SAVING**

Time is crucial for patients; sterile dressing kits will improve clinical efficiency and save time for doctors to diagnose.

- **COST EFFECTIVE**

From procurement to sterilization, our one-site purchase system provides you complete supply chain, give you most cost effective choice

- **EASY STORAGE**

All-in-one and ready-to-use sterile dressing kits are Suitable for many healthcare settings. Components are sequentially packaged. Compact packaging is easy to store and deliver.

Diparin™

HEPARIN SODIUM INJECTION I.P.

AVAILABLE IN
5000 IU & 25000 IU

Diparin™

Heparin Sodium Injection I.P.

INDICATIONS AND USAGE

Composition:

It is sterile, non-pyrogenic solution of heparin sodium in water injection along with Benzyl Alcohol as preservative. Each vial contains 5000 or 25000 Heparin units

HEPARIN SODIUM INJECTION is an anticoagulant indicated for:

- Anticoagulant therapy in prophylaxis and treatment of venous thrombosis and its extension
- Low-dose regimen for prevention of postoperative deep venous thrombosis and pulmonary embolism in patients undergoing major abdominothoracic surgery or who (for other reasons) are at risk of developing thromboembolic disease
- Prophylaxis and treatment of pulmonary embolism
- Prophylaxis and treatment of peripheral arterial embolism
- Atrial fibrillation with embolization
- Treatment of acute and chronic consumptive coagulopathies (disseminated intravascular coagulation)
- Prevention of clotting in arterial and cardiac surgery
- Heparin may also be employed as an anticoagulant in blood transfusions, extracorporeal circulation and dialysis procedures

DiflowTM

IV Infusion Set

AVAILABLE IN
Diflow Plus / Diflow Premium

Diflow™

IV Infusion Set

FEATURES :

- For Gravity Feed Only
- Special beveled extra strong spike
- Flexible drip chamber without air vent for rapid adjustment of fluid
- Soft and kink resistant tubing ensures uniform flow rate
- Smooth roller clamp facilitates easy, safe control and adjustment of fluid rates
- Needle 21G for smooth flow
- Individually Packed, for single use only
- Disposable Nontoxic and pyrogen free
- EO sterile, ready for use

DiflowTM

AV Fistula Needle

AVAILABLE IN
15G / 16G / 17G

Diflow™

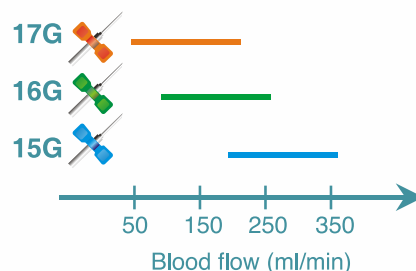

AV Fistula Needle

FEATURES & SPECIFICATION

- Oval-shaped large back-eye prevent turbulence and minimize tissue damage.
- Color-coded bevel index for clear indication of needle position
- Premium luer-lock connector with wing for safe connection to the bloodline system
- Color-coded wings and packaging clearly indicating the gauge size
- Soft tubing with anti-kinking properties
- Excellent needle quality for smooth treatments
- Silicone coating to prevent blood coagulation.
- Sterilized in EO gas.

DiaQ[®]

Blood Tubing Set

PRE PUMP / POST PUMP

DiaQ[®]

Blood Tubing Set

FOR BLOOD TUBING SET - HEMODIALYSIS

- **General specification & Features:**

- ▶ Medical grade materials displaying good bio-compatibility
- ▶ Fluid pathway is smooth inside, no clotting or air bubbles
- ▶ Tubes are flexible and kink-resistant
- ▶ Color coding
- ▶ Pump segment has excellent anti-fatigue performance
- ▶ Luer lock connectors are according to international standard
- ▶ Pump Segments for Conventional and High Flow Rates
- ▶ One-stop Blood Clamp
- ▶ Priming/Rinseback Connector
- ▶ Unique Luer Lock Patient Connector
- ▶ Compact, one piece Filter Finger grips on connectors
- ▶ Self-sealing injection sites

- **Technical parameter:**

- ▶ Physical appearance: Transparent and smooth
- ▶ Adaptability: Match with all dialysis machine
- ▶ Properties of products: Safe, convenient and easy operation. Pump segment has good elasticity, and maintain steady flow for 50 hours of continuous running.
- ▶ Sterilized by ethylene oxide, the product is sterile, non-toxic, pyrogen free and no adverse reaction.
